Data Structures and Algorithms - Assignment 4

1. https://leetcode.com/problems/two-sum
2. https://leetcode.com/problems/two-sum-ii-input-array-is-sorted/description/
3. https://leetcode.com/problems/container-with-most-water/
4. https://leetcode.com/problems/delete-the-middle-node-of-a-linked-list/description

Optional

5. https://leetcode.com/problems/linked-list-cycle/description
6. https://leetcode.com/problems/palindrome-linked-list
7. https://leetcode.com/problems/middle-of-the-linked-list/description
8. Implement menudriven program to maintain linked list of employees and provide below operations (use any type of linked list).

- Add employee (Perfrom any add operation)
- Display all employees
- Search employee by name
- Delete employee by empid
- Update salary of employee
- sort employees by salary

9. Implement stack and queue using linked list
10. Write a menu driven program to perform operations on linked list. Also provide option for undo and redo. At any moment if you do undo, last operation performed on linked list should rollback. Your application should support at least 5 undo and redo operations.
